

SOMETHING KILLING YOUR PLANTS?

WE CAN HELP!

TAKE OUR EVENING CLASS!

HORT 132 - INSECTS & DISEASES

FALL SEMESTER 2009

HORT 132 - Insects & Diseases

Class focuses on the common insect, disease, and environmental problems encountered in the local landscape and garden. Emphasis will be on identification of the pest and recommending control measures that coincide with the pests life cycle. Modern pesticide application methods and equipment are also included. Successful completion of course prepares the student for the Illinois Pesticide Applicator/Operator license.

Highlights

- Identify over 100 common insects, disease, and environmental problems.
- Discussion of alternate strategies of pest control.
- Selection, calibration, and operation of common pesticide application equipment.
- Diagnosis of plant problems.
