

# HORT 124

## Horticulture Construction

### HORT 124

### Hort Construction

*Class focuses on the selection and design criteria for various construction features in the landscape. Emphasis will be on proper design and construction of common landscape features including paver surfaces, walls, fences, and edging. Also included will be an introduction to project mathematics and estimation.*

*Two Saturday laboratories will be scheduled.*

#### Highlights

- How to properly construct paving surfaces in the landscape.
- Proper techniques for segmental concrete retaining wall construction.
- What determines which construction material should be selected for the landscape.
- Calculation quantities of materials needed for construction projects.

PATIOS

WALKWAYS

WALLS

*How are they built?*
