

Career Clusters

What is a Career Cluster?

In today's world, you have to plan for your career early. That means as early as middle school and high school, you should be thinking about what you'd like to do as an adult.

Career Clusters are all about giving you the information you need to decide about your career. A "cluster" describes a group of careers that have specific knowledge (things you know) and skills (things you do) in common. Clusters are groups of occupations and industries that have things in common:

- Common courses you need to take to be prepared for career success
- How well you have to communicate in writing or verbally
- What skills you need to "solve problems" or "figure things out"
- The different ways you'll use computers and technology on the job
- What types of leadership or teamwork abilities are necessary on the job
- Health, safety, and legal responsibilities of different jobs
- Technical skills for "hands on" jobs

Take a look at the list of the 16 Career Clusters on this page.  As you explore each cluster, ask yourself these questions:

- Does the general area interest me?
- Do I think careers in this area would fit my personality and what I value in life?
- Do I want to learn more about how to succeed in this career?

Once you have a general idea of what careers appeal to you, the next step is to find out how to get there. Each cluster contains several career pathways. "Pathways" give you a direction by linking your career interests to a specific educational program. As you move from high school to college, career clusters and pathways can be your guide to make the right choices about your education.

Check out the ICC programs on the reverse side to get your roadmap and start your journey to a great career.

Contact the ICC Career Center for access to career planning tools and more information about occupations. (309) 694-5153
