Copyright Awareness Group Assessment

Work with a group of 3-4 and suggest your answers to these questions.

Q#1 - "I found a comic strip that I would like to project on the screen to help teach a point of the curriculum. Can I use this without obtaining permission?"

Q#2 - "I would like to use the workbook that accompanies my textbook. Although it covers the entire text, I only need the first three chapters. I don't want to have the students pay \$25 for the workbook, so I would like to copy the first three chapters. Would this fall under the fair use guidelines?"

Q#3 - Will the TEACH Act allow me to take an entire journal article that I would have needed to place on reserve and make it available to my students via Blackboard?

Q#4 - May I rent or buy a video that I want to use in my classroom?

Q#5 - May I copy a portion of the videotape to use in my own classroom presentation?

Q#6 - I compiled a course packet for my class. I included 8 different diagrams that I found in published works. Will these diagrams fall under the fair use category, allowing me to use the material without obtaining permission?
