

# Microsoft Certified IT Professional (MCITP) Enterprise Administrator

The MCITP: Enterprise Administrator certification can help you develop and validate your skills in your current position or advance you toward a future job role, such as:

- Enterprise systems administrator
- IT systems manager
- Enterprise security administrator
- Systems architect
- Network administrator

The Microsoft Certified IT Professional (MCITP) credential is the leading certification for Windows Server 2008. It provides widely recognized, objective validation of your ability to perform critical, current IT job roles by using Microsoft technologies to their best advantage.

## Candidate profile

Candidates for this certification are IT professionals who seek a leadership role in Windows infrastructure design in a current or future job role, in which they work with Windows Server 2008.

## How to earn the MCITP: Enterprise Administrator certification

To earn this certification, candidates must pass five exams: four Microsoft Certified Technology Specialist (MCTS) prerequisite exams and one Professional Series exam.

Our Instructor-led training is conducted by a Microsoft Certified Trainer (MCT), using Microsoft Official Curriculum.

**Cost of Classes plus exams: \$15,970**

**PDI Package Price: \$ 9,950**

(includes classes, courseware and exam vouchers)

**You save \$6,020!**

The Instructor-led series runs from September 8, 2009 - January 22, 2010.
